

AI Analyzer Report

****Overall Resume Score****

* 42/100

****ATS Score****

* 25/100

****Professional Summary****

* Generic career objective focused on learning rather than technical value offered.

****Skills Identified****

* Python, C Programming

* Cyber Security Fundamentals

* Basic Networking Concepts

****Missing Skills****

* Linux / Unix Administration

* Wireshark, Nmap, Metasploit

* SIEM, Firewalls, Vulnerability Scanning

****Strengths****

* Relevant degree specialization in Cybersecurity

* Includes a relevant Python security project

* Clean structure of project details

****Areas for Improvement****

* Severe character spacing breaks ATS readability entirely

* Includes irrelevant high school/junior college details

* Lacks practical hands-on security tool experience

****ATS Keyword Analysis****

* Matched Keywords: Python, Networking, Cyber Security

* Missing Keywords: Linux, Pen Testing, SIEM, Incident Response

* Keyword Match: 30%

****Section Evaluation****

* Professional Summary: 4/10

* Technical Skills: 4/10

* Projects: 5/10

* Experience: 0/10

* Education: 6/10

****Grammar and Formatting****

* Grammar Score: 8/10

* Formatting Score: 2/10

* Formatting Issues: Character spacing across text renders resume unparsable by ATS.

* Grammar Issues: Generic phrasing in objective section.

****Recruiter Recommendation****

* Reject

****Recommended Improvements****

* Remove spaces between individual letters to fix ATS parsing.

* Include core cybersecurity tools like Linux, Wireshark, and Nmap.

* Remove Class X and Class XII education sections.

* Replace career objective with a targeted technical summary.

* Add 1-2 additional security projects or lab environments.

****Final Verdict****

* Reject
