

AI Analyzer Report

****Overall Resume Score****

55/100

****ATS Score****

60/100

****Professional Summary****

Clear objective for an entry-level GenAI/Python internship, but lacks technical depth and measurable achievements.

****Skills Identified****

- Python
- Basic SQL
- Git & GitHub
- Prompt Engineering

****Missing Skills****

- LangChain / LlamaIndex
- Vector Databases (FAISS, Pinecone)
- REST APIs (FastAPI / Flask)
- Deep Learning Frameworks (PyTorch / TensorFlow)

****Strengths****

- Strong alignment with AI/ML academic background.
- Relevant beginner projects focused on GenAI and APIs.
- Clean contact details and included GitHub profile link.

****Areas for Improvement****

- Projects are incomplete and lack technical detail or metrics.
- Soft self-descriptors like "Learning" and "Basic" weaken the skills section.
- Unformatted strengths section lacks proper bulleting.

****ATS Keyword Analysis****

- Matched: Python, SQL, Git, GitHub, Streamlit, Gemini API, Prompt Engineering.
- Missing: LLM, RAG, Frameworks, APIs, Data Structures, Machine Learning models.

****Section Evaluation****

- Summary: 6/10
- Education: 7/10
- Projects: 4/10
- Skills: 5/10

****Grammar and Formatting****

- Typo detected in Education: "CGP A" instead of "CGPA".
- Strengths list lacks spacing and bullet structure.
- Grammar: 8/10, Formatting: 6/10.

****Recruiter Recommendation****

- Suitable for entry-level internship screening after project completion.

****Recommended Improvements****

- Complete projects and detail specific architectures used (e.g., RAG, LangChain).
- Remove weak qualifiers like "Basic" or "Learning" from technical skills.
- Fix formatting typos ("CGP A") and format Strengths as a bulleted list.
- Add coursework details like Data Structures and Machine Learning fundamentals.

****Final Verdict****

Maybe
