

AI Analyzer Report

■ Overall Resume Score

Score: 78/100

■ ATS Score

Score: 82/100

■ Skills Identified

- Selenium (Java) & Tosca
- API Testing (Postman)
- SQL & Database Testing

■ Missing Skills

- CI/CD (Jenkins, GitLab)
- Git / Version Control
- REST Assured / Cucumber (BDD)

■ Strengths

- Strong domain expertise across Banking, Healthcare, and Logistics.
- Solid balance of API, manual, DB, and automation skills.
- Quantifiable business impact listed (20% UAT execution time reduction).
- Clean, standard section layout.
- Excellent alignment for Senior QA / Test Lead roles.

■ Weaknesses

- Experience section uses dense paragraphs instead of bullet points.
- Contains redundant personal details (DOB, location, spoken languages).
- Lack of version control (Git) and CI/CD tools.
- Achievements are listed separately instead of under relevant roles.
- Automation depth/framework structure is not fully detailed.

■ ATS Keyword Match

Matched Keywords:

- Selenium, Postman, TestNG, SQL, JIRA, Agile, Tosca

Missing Keywords:

- CI/CD, Jenkins, Git, REST Assured, BDD, Playwright

Keyword Match: 75%

■ Section Ratings

Professional Summary: 8/10

Technical Skills: 8/10

Projects: 6/10

Experience: 7/10

Education: 8/10

■ Grammar & Formatting

Grammar Score: 9/10

Formatting Score: 7/10

Formatting Issues:

- Job responsibilities styled as block text instead of bullets.
- Personal Details section adds unnecessary fluff.

Grammar Issues:

- Minimal issues; phrased clearly overall.

■■■ Recruiter Verdict

Shortlist

■ Top 5 Improvements

1. Convert job experience paragraphs into bulleted, result-driven statements.
2. Remove the "Personal Details" section completely.
3. Add key missing technical keywords like Git, Jenkins, and BDD frameworks.

4. Move metrics/achievements under their corresponding employment entries.
5. Detail specific automation framework architectures used (e.g., Data-Driven, Hybrid POM).
